

Transform your business with AGC's mixed reality solutions

Enhance training and standardize processes across your business

Choose your path:

(Remote Assist)

Collaborate from everywhere with XR devices and Dynamics 365 Remote Assist training

(Holographic Procedures)

and get on-the-job guidance with new AR content, including 3D animated holograms and learning management system (LMS)

(Innovative Partner)

and integrate the latest IoT interfaces, AI-based image recognition, and custom XR apps into your environment.

Select the best XR devices and hardware for your specific needs

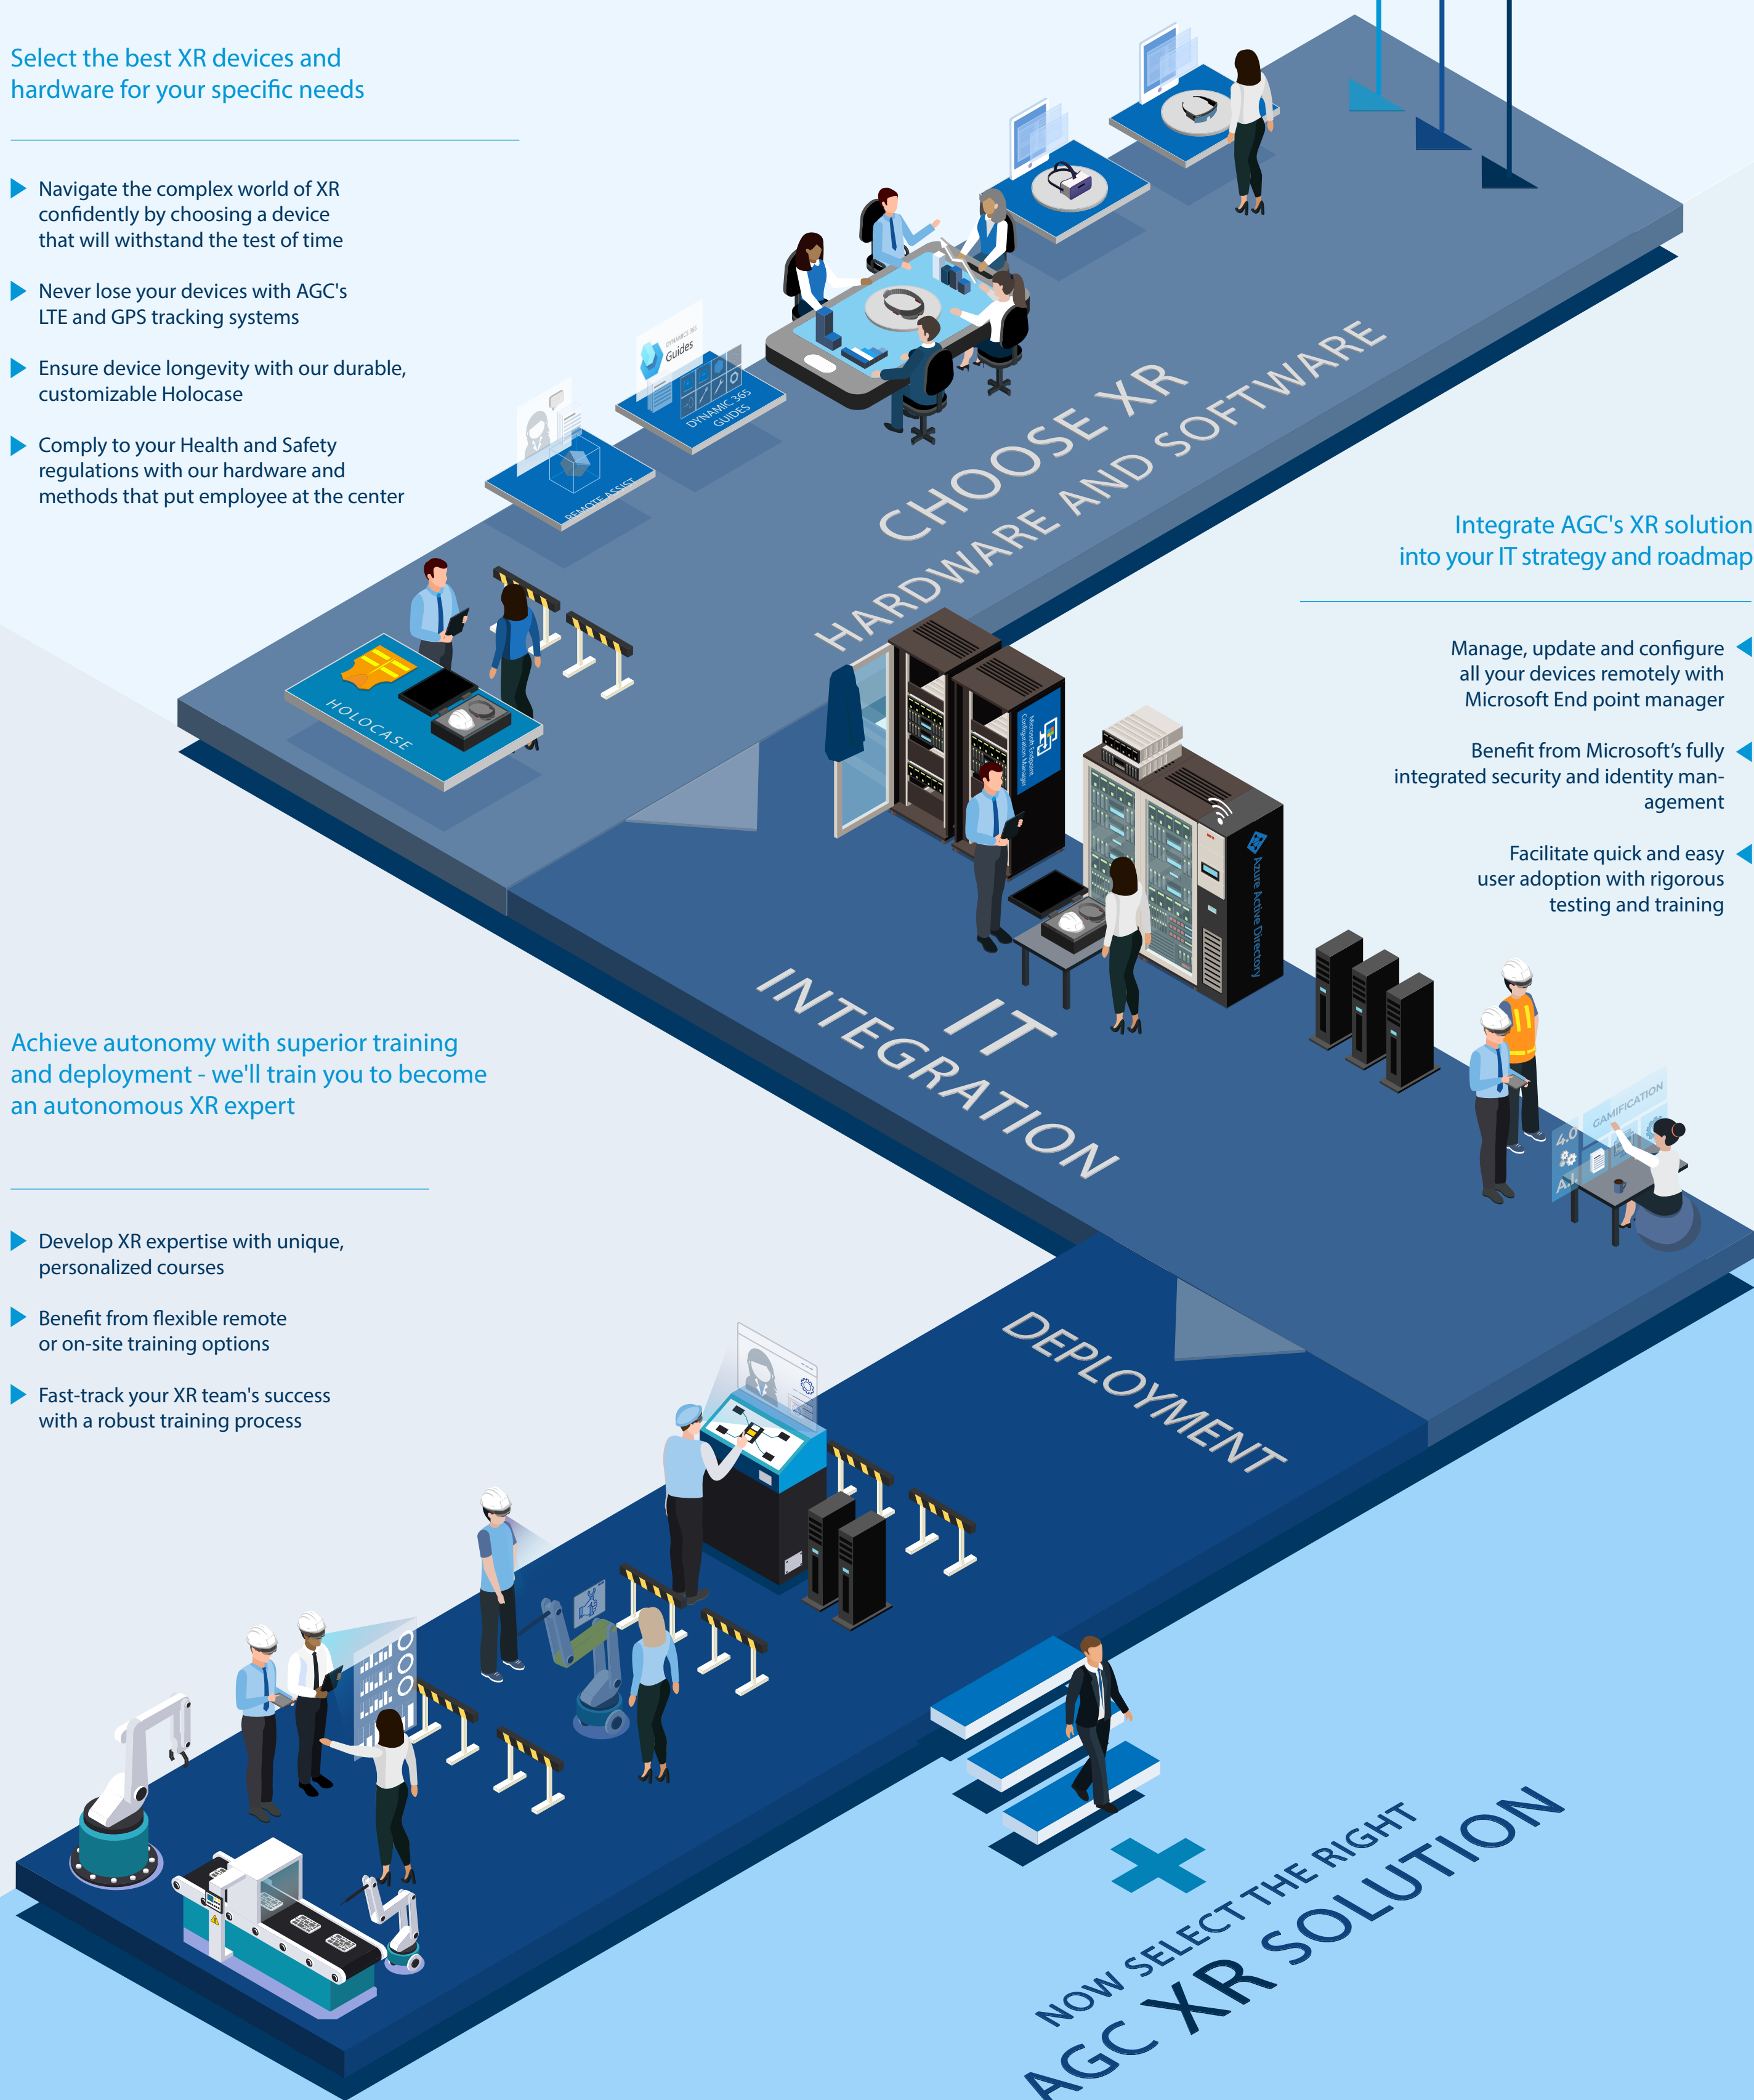

- ▶ Navigate the complex world of XR confidently by choosing a device that will withstand the test of time
- ▶ Never lose your devices with AGC's LTE and GPS tracking systems
- ▶ Ensure device longevity with our durable, customizable Holocase
- ▶ Comply to your Health and Safety regulations with our hardware and methods that put employee at the center

Achieve autonomy with superior training and deployment - we'll train you to become an autonomous XR expert

- ▶ Develop XR expertise with unique, personalized courses
- ▶ Benefit from flexible remote or on-site training options
- ▶ Fast-track your XR team's success with a robust training process

Integrate AGC's XR solution into your IT strategy and roadmap

- ▶ Manage, update and configure all your devices remotely with Microsoft End point manager
- ▶ Benefit from Microsoft's fully integrated security and identity management
- ▶ Facilitate quick and easy user adoption with rigorous testing and training

Remote Assist Package

Deploy devices in record time with Dynamics 365 Remote Assist training, enhancing development capabilities and reducing travel costs

- ▶ Access comprehensive and trusted practical training programs
- ▶ Get hands-on training that will set your team up for success
- ▶ Validate your internal knowledge with our training certifications

Holographic Procedures Package

Scale up and standardize training with custom Dynamics 365 guides in addition to Remote Assist

- ▶ Offer trainees an in-depth understanding of complex systems with 3D animations, including x-ray vision effects, dynamic procedures with branching and interactive responses
- ▶ Validate information for your XR team with our built-in LMS
- ▶ Use guides on tablet devices with AGC's app to deliver better, scalable and consistent training with live reporting

Innovative Partner Package

Take innovation to the next level with the latest XR and IoT best practices and developments

- ▶ Visualize equipment live feed parameters to help identify and rectify problems in an instant
- ▶ Develop process deviation alerts to notify you of discrepancies in your production cycles
- ▶ Validate users' actions and suggest corrections in real time using AI-based image recognition
- ▶ Create custom XR-powered apps to further enhance your existing processes

AGC is your ideal partner to make your vision of innovation a reality
